NEW CD OF THE WEEK: LIGHT AND GOLD

Light and Gold is the first in a stunning collection of Eric Whitacre's choral works conducted for the first time by Eric himself and performed by The Eric Whitacre Singers, Laudibus and friends. Click here to see Whitacre introducing his new CD.

See complete track listing and purchase Light and Gold by clicking here. A portion of every CD sold through this portal supports the programming on Colorado Public Radio. Thank you!

Composer and conductor Eric Whitacre is not just a modern day choral composer. He's harnessing the power of the internet to create breathtaking creations of his music. Last year he created a "virtual choir" with nearly two hundred singers (including our own David Rutherford's daughter). Each singer sent Whitacre a video of him or her singing his gorgeous "Lux Aurumque". Whitacre stitched these videos together for a stunning virtual choir. See this remarkable video here.
